SPANISH FLU IS EPIDEMIC

Three Deaths in Kansas Town From Disease.

200 Cases in Ellis County

Increasing at Camp Funston At Rate of 300 a Day—16 Deaths in New York in 24 Hours.

Topeka, Oct. 1.—Two hundred cases of Spanish influenza at Hays, Ellis county, Kan., were reported to the state board of health today. Dr. L. J. Royer, of the department, was at once sent to Hays to assist in pulling down the epidemic. Two more deaths have occurred at Hays making a total of three. The state normal school and Hays city schools have been closed.

The 47th regiment later received official notice from Camp Funston that a strict quarantine has been established there. No visitors are admitted and no leave granted.

It is reported that the epidemic there is increasing at the rate of about 300 a day.

EPIDEMIC IN NEW YORK.

Feverish Deaths Occur in East 43 Hours.

New York, Oct. 1.—With 418 new cases of Spanish influenza reported in New York city today, 24 hours after 600 cases were reported yesterday, the death toll mounted to 43.

The city health commissioner, Dr. O’Hare, declared today that the disease had reached the proportions of an epidemic in the city.

300 New Cases Camp Custer

Battle Creek, Mich., Oct. 1.—More than 300 additional cases of Spanish influenza were reported at Camp Custer, this forenoon.

Three Deadly Camp Taylor

Laredo, Tex., Oct. 1.—Patients suffering with Spanish influenza increased from 2,000 to approximately 8,000 during the week at Camp Laredo. Three deaths from pneumonia were reported.

A Cold Day, Too.

Connecticut, Oct. 1.—A case of pneumonia was reported today in a young man taking a walk in the cold.

Public School Closed.

Springfield, Mass., Oct. 1.—The public schools here were ordered closed today as a result of pneumonia cases.

A meeting of the board of health was held by the board to consider the closing of all public buildings until the danger of a more serious epidemic is passed.

Only one death has been reported from this case.
FIVE IN ONE HOME HAVE INFLUENZA

Five persons in the Hundley home on rural route No. 1 have Spanish Influenza. They are John and Frank Hundley and the latter’s three children. The children are very sick. The house has been put under a strict quarantine.
Nortonville Young Man Dies from Influenza

Nortonville is all broken up over the death of Charles Robinson, a particular fine young man of that place. He died yesterday from Spanish Influenza, at Camp Taylor, Ky., where he was attending an officers' training school for the artillery. He had been sick about a week. His mother left Nortonville several days ago, and was with him when he died.

Charles Robinson was a son of Mr. and Mrs. Ed Robinson, and a graduate of the Nortonville high school. A bright, clean-cut and popular young man he had progressed in his home town until he was assistant cashier of the Exchange State Bank, of Nortonville, when he entered the service last spring. He was sent first to Camp Lewis, Wash., and from there to the Kentucky training school, to be prepared for a commission. Besides his parents he leaves three brothers, one of whom is in the service in France, and four sisters. The burial probably will be in Nortonville Thursday, the hour to be announced later.

More materials are needed.

The Lancaster school also was closed this afternoon and a ban was placed on all public gatherings. There are four cases of influenza.
FLU SPREADS IN KANSAS

In 48 Hours 1178 New Cases Reported.

STATE UNIVERSITY CLOSED

But Students Ordered to Remain in Lawrence-Hutchinson and Lawrence Closed Schools and Theatres.

Topeka, Oct. 4.—The Spanish influenza is spreading in Kansas at a rate that is giving the state health department grave concern, officials asserted today. In 48 hours 1,178 new cases were reported, as against a few hundred for the preceding week. A county alone has reported more than 500 cases. Several counties have reported 100 cases.

There are now thirty cases in the state university and department secreted today. Six cases have developed in the city jail and it has been placed under quarantine. All state institutions were quarantined against visitors today. Herington has 61 cases and the schools were closed today.

State University Closed.

Lawrence, Oct. 4.—Under orders from the health authorities, the University of Kansas, the public schools and motor movie theatres are closed today to prevent possible spreading of the influenza epidemic. University students were ordered to remain in the city.

Hutchinson Health Board Acts.

Hutchinson, Kan., Oct. 4.—By an order of the city board of health the Hutchinson schools, churches, theaters, etc., will be closed and all public gatherings prohibited until further notice. The general prevalence of influenza and what is supposed to be a few local cases, is given as the cause.

New Deaths.

Kansas City, Mo., Oct. 4.—Nine additional deaths due to Spanish influenza, and 14 new cases of the disease were reported to the health authorities during the twenty-four hours ending at noon today. These cases were being taken by special board this morning, it is understood, to prevent the spread of the disease. The city health board has been requested to limit the number of persons that may stand in one car to twenty.

St. Louis Closed Two.

St. Louis, Oct. 4.—The closing order of the St. Louis Board of health which prevents all meetings indoors and outdoors, except at St. Louis University, will cease the disturbance of the health authorities until the order is rescinded. While Washington University is closed the city, however, has the military unit at Washington University for quarantine, and the military men know the past Saturday is material.
TO ISOLATE FLU PATIENTS

Charles A. Brown Donates Building for Use.

MANY NURSES VOLUNTEER.

Forty-two placed themselves at disposal of Miss Grace Crosby Power.

Pitman suffering with Spanish influenza will be isolated on the second floor of the old Atchison hospital on Third and University streets, where quarters have been prepared for isolation as recommended by Dr. Charles W. Hathaway, county health officer, and the Atchison county health board.

Forty-two nurses and women who have been taking care of sick and injured in this city and county, placed themselves at the disposal of Miss Crosby Power, who has donated a house on Main street for their use.

The nurses will be in charge of Captain Harry S. Todd, who was in charge of the hospital during the Spanish influenza epidemic. Captain Todd will serve under the orders of the local Red Cross chapter.

The patients will be attended by nurses and doctors who have served during the influenza epidemic.

The building will be used exclusively for the care of flu patients and will be equipped with the latest apparatus for the treatment of the disease.

The Atchison Daily Globe (Atchison, Kansas) · Thu, Oct 10, 1918 · Page 1
NO SATURDAY NIGHT CROWDS

Stores To Close At 7 P. M
By Order of Mayor.

ON ACCOUNT OF INFLUENZA

Orders Were Issued to All Atchison Merchants This Morning
Through the Police Department.

Taking extra precaution against the spread of Spanish influenza in Atchison, Mayor Weinman this morning issued an order that all stores close at 7 p.m., Saturday evening until further orders.

Auchison is what is known as a "Saturday night town." Everybody who can comes down after supper and the sidewalks are a perfect jam on Commercial street.

Influenza is essentially a crowd disease; it is spread by intimate contact, and fought by isolation. For that reason it has been deemed advisable to dispense with all public gatherings likely to be attended by more than twenty persons. Schools and theatres have been closed, but this would have been useless if the Saturday night crowds were permitted in the opinion of the mayor and his advisors.

Merchants are not kicking. They are complying freely only too glad to do what they can to prevent a real epidemic here.

WILL CUT AUSTRIA
Notice!

Until the Spanish influenza closing orders are revoked, street cars will discontinue their service at 8 o'clock p.m., beginning tonight.

Atchison Railway, Light & Power Co.
Mangelodorf
Dry Goods. Telephone 132.

--Buy Bonds--Buy Bonds

There is no business into which money can now be invested to better advantage than this business of Winning the War.

Owing to the ruling of the Health Board, this store will be open for business Saturday evening until 7:00 instead of 9:00.
PLACE BRIDGE IN QUARANTINE

Traffic to be Strictly Regulated at Night.

TH: FROM 6 O'CLOCK UNTIL 12 OVER

Only Persons Going To and From Work Will Be Permitted to Cross.

Louis Weinman, mayor of Atchison, this afternoon placed the Atchison & Eastern Bridge Company in quarantine, to prevent congregations of men in East Atchison saloons, where Spanish influenza might be spread.

Only persons going to and from work will be permitted to cross the bridge between 6 o'clock and 12 o'clock any night until Sunday, October 20, unless an extension of the quarantine is considered necessary by the local board of health.

Mayer Weinman's action followed the receipt of a telegram from the office of S. M. Brewer, attorney general, in reply to a query sent by Dr. Charles W. Robinson, city physician, as to whether the local health board has the power to place the bridge under quarantine regulations.

"It is within your discretion to establish any quarantine regulations you consider necessary to prevent the spread of the epidemic or to prevent the influx of the disease from Missouri," said the telegram, "and you are empowered to limit any movements of persons or the exit or entrance of such persons whom you suspect may have been exposed to the infection."

This order virtually closes East Atchison saloons after 6 o'clock at night, and is the only way the local health authorities could prevent the congregation of hundreds of men in small, close rooms over there, which might have resorted in scores of new cases.

(Continued on page 2.)
PLACE BRIDGE IN QUARRANTINE

(Continued from Page 1)

miles south of Effingham, who is suffering pneumonia complicated with influenza, is unchanged today. Only one serious case, caused by the pneumonia complication, has been reported today. That is the case of A. Eceleben, of Emporia, a student at Midland college and a member of the Students' Army Training Corps. His case has been isolated, and Mrs. Virginia Kimble, visiting nurse, is attending him, going there last night after efforts to get nurses from St. Joe and Kansas City had failed. Both cities are short of nurses on account of epidemics there.

"There is not the slightest doubt about the necessity of drafting members of Atchison first aid classes," said Dr. Robinson today, "as the nurse shortage is extremely serious."

David Hayes, his wife and five children all are severely ill with influenza at their home, 714 Spring street, and three of the children were in one bed until this afternoon, when eots were provided by the Atchison county Red Cross chapter. A nurse has been placed in charge of the house.

Dr. J. E. Thompson, of Huron, telephoned to Dr. Robinson today for four nurses at once, and Dr. G. E. White, of Effingham, telephoned for one. Neither appeal could be responded to on account of the shortage of nurses.
WILL MOBILIZE
KANSAS DOCTORS

Also Nurses as Influenza Epidemic Is Very Dangerous.

Topeka, Kas., Oct. 12—Dr. J. S. Crumbine, head of the state Health department, today received a telegram from Surgeon General Blue at Washington requesting that immediate preparation be made to mobilize all doctors and nurses in the state for volunteer services wherever sent. Dr. Crumbine believes the plan includes sending doctors and nurses from one state to another to help put down the influenza epidemic. There already is scarcity of both doctors and nurses in this state, Dr. Crumbine asserts. An appeal was received today by the board from Natham, Butler county for a doctor.
211,000 “FLU” CASES

In Army Camps There Is Gain—With 7,432 Fatalities Reported.

Washington, Oct. 11—Two hundred and eleven thousand cases of influenza have been reported in army camps to date, with 7,432 fatalities.

One week ago only 17 of the 42 larger camps were infected. There are now 33 camps reporting more than 500 cases each for the week. The number of new cases and deaths, as reported to the war department, continued to show an increase.

TODAY’S CASUALTY LIST
SPANISH FLU 'ABOUT FLUED OUT IN PLACES.

In Springfield, There Is a Marked Decrease in New Cases.

Springfield, Mo., Oct. 12—A marked decrease in the number of new cases of Spanish influenza reported yesterday has encouraged health authorities to believe that this city is rapidly emerging from the epidemic. Preparations are being made to open a whirlwind Liberty Loan campaign on the day the ban against public meetings is removed. There were ten deaths reported yesterday. Only 75 new cases were reported. There were three additional deaths this morning.

Globe want ads work while you loaf.
Only ten new cases of Spanish influenza were reported to Dr. Charles W. Robinson, city physician, today, which indicates the strict quarantine regulations are having effect. Forty-six new cases were reported yesterday. The total cases on record now is 174.
"FLU" VICTIM IN COUNTRY

Death From Pneumonia, Following Influenza.

ALBERT ROLL, PRAIRIE VIEW

Was Born and Reared on Farm Where He Died, and Leaves a Widow and Five Children.

Albert Roll, a prominent farmer of the Prairie View neighborhood, six miles south of Effingham, died at 5 p.m. yesterday from pneumonia, following influenza. He had been sick ten days. Two children in the family now have influenza.

Forty years old last Sunday, Mr. Roll had all his life been a resident of Prairie View. He was born and reared on the farm where he died, and was one of the finest and most highly esteemed men in the community. He was married in 1887 to Miss Addie Longest, who with five children, survive. The eldest is ten years old; the youngest are twins three years old.

It will be remembered that one of the children, Earl, was badly burned three months ago through drinking concentrated lye. No expense or trouble was spared by the devoted parents to relieve his suffering and restore him to health, and he is now in Kirkville, Mo., under treatment. His mother was there with him until a few days ago.

Besides his immediate family Mr. Roll is survived by a brother, Fred Roll, of Birney, Mont., and a sister, Mrs. Ida Hammond.

The funeral will be at 2:30 p.m. Sunday, and will be private. The burial will be in the Effingham cemetery.

LANCASTER-HURON,
October 31, 1895, severe earthquake shock felt at Atchison.

BRIDGE BAN ON AT NOON

To prevent the assembling of the usual afternoon crowds in East Atchison today, Mayor Louis Weinman this morning ordered the ban on bridge traffic to become effective at noon today instead of at 6 o’clock this evening. This is effective only today and next Saturday. Other days the bridge goes into quarantine at 6 o’clock in the evening and remains false in that state until 12 o’clock at night.
SPANISH INFLUENZA—WHAT IT IS AND HOW IT SHOULD BE TREATED

Nothing New—Simply The Old Grip, or the Gripe That Was Epidemic in 1893-94, Only Then It Came From Russia by Way of France and This Time by Way of Spain.

Go to Bed and Stay Quiet—Take A Laxative—Eat Plenty of Nourishing Food—Keep up Your Strength—Nature Is The Only “Cure.”

ALWAYS CALL A DOCTOR

NO OCCASION FOR PANIC.

Spanish influenza, which appeared to fluid in May, has all the appearance of a grip or a grippe, which has swept over the world in numerous epidemics as far back as history was written. The disease is, however, not so serious. In fact, many victims are reported not to have caught more than a cold.

This is not to say that the disease is not a serious matter. Many lives are at stake.

What to Expect?

Spanish influenza is a disease that is likely to cause panic. However, it is not as dangerous as the Spanish flu. People should follow the advice of medical professionals and avoid spreading the disease.

The Disease

Spanish influenza is caused by a virus that attacks the respiratory system. Symptoms include coughing, fever, and headaches. The disease is transmitted through droplets expelled when an infected person coughs or sneezes.

How to Treat Spanish Influenza

There is no specific treatment for Spanish influenza. However, there are several measures that can help reduce the severity of the symptoms.

1. Stay hydrated: Drink plenty of fluids to avoid dehydration.
2. Get plenty of rest: This will help the body fight off the infection.
3. Use over-the-counter medication: Over-the-counter medications such as acetaminophen or ibuprofen can help reduce fever and pain.

Preventive Measures

Here are some preventive measures that can help reduce the spread of Spanish influenza:

1. Wash your hands frequently: This is the most effective way to avoid spreading the disease.
2. Avoid close contact: Stay away from people who are sick.
3. Cover your mouth and nose when you cough or sneeze.

In conclusion, Spanish influenza is a disease that is not as serious as the Spanish flu. However, it is important to follow the preventive measures to avoid spreading the disease. If you have any concerns, it is always best to consult a doctor.
FIRST DEATH FROM INFLUENZA TODAY

Mrs. Ida Anna Kohn, wife of Simon Kohn, of Kohn & Jacobs, died today from pneumonia following Spanish influenza, at her home, 1001 Atchison street. Her illness was one of the first cases of influenza in Atchison, as she became ill September 30. Pneumonia developed last Monday. Hers is the first death in Atchison county from influenza and complications.

Mrs. Kohn was a woman of lovely character and had hundreds of friends. She came to Atchison 12 years ago from her birthplace in Russia, bringing her four children, and joining her husband, who had been here a year. With a very small start Mr. Kohn built up a large junk business and became quite wealthy.

She is survived by her husband and five children, the youngest, Edith, 12 years old, having been born in Atchison. The other children, born in Russia, are Rebecca, the oldest, 22 years of age, and Ellen, Mary and Lena. A half-brother, Louis Marks, lives in Atchison, and another half-brother, Phillip Marks, resides in Kansas City. She also is survived by a brother, Louis Miller, who lives in Pennsylvania.

There will be no funeral services in Atchison, and the body will be taken to Kansas City tomorrow morning, where burial will be made.

The first Pekingese dog in England
ONLY 17 NEW FLU CASES

Only 17 new cases of influenza were reported today in Atchison and the county, and 12 of these were in the vicinity of Effingham. Dr. Charles W. Robinson, county health officer, is sick in bed, but not with the flu. He is suffering from the strain he has been under since the epidemic started and the loss of sleep. Several nights he has not been able to sleep at all, on account of the many calls made upon him as city and county physician for assistance.

The emergency hospital at Third and Commercial streets, in charge of Mrs. Virginia Kimble, visiting nurse, has six patients, all of them men. Four new cases were reported from Midland college today, and only one from Atchison proper. One more death from pneumonia following influenza occurred Saturday night, that of the late Harry Park. The 17 reported today include new cases for both Sunday and this morning. Saturday 10 new cases were reported against 46 Friday.

FLU GAINING IN KANSAS

More than 5,000 New Cases Reported in Kansas.

Topeka, Kans., Oct. 14—More than three thousand new cases of Spanish influenza throughout the state were reported today to the state board of health. These reports cover Sunday and part of today and indicate that the epidemic is gaining. Board of health officials state however that with the state closing order now in effect, a marked decrease in the number of cases is expected to set in within forty-eight hours. They say the worst outbreak of the disease in the state is in Crawford county where there are many mining camps and towns.

Topeka today has four hundred and four cases and the 72-room hotel recently rented as an isolation hospital already is almost filled with patients. Four more deaths occurred in Topeka yesterday and today.

CITY ITEMS.
SPANISH INFLUENZA--WHAT IT IS AND HOW IT SHOULD BE TREATED

Nothing New--Simply The Old Grip, or la Gripe That Was Epidemic in 1889-90, Only Then It Came from Russia by Way of France and This Time by Way of Spain.

Go to Bed and Stay Quiet--Take A Luxurious-Eat Plenty of Nourishing Food--Keep up Your Strength--Nature Is The Only Cure.

ALWAYS CALL A DOCTOR

NO OCCASION FOR PANIC.

Spanish influenza, which appeared in Spain in May, has, as all the appearance of grip or "la grippe," which has swept over the world in numerous epidemics as far back as history, manifested itself in the U.S. which is regarded by many as having the first case in the fall, but was not recognized as such until the second wave, which has had its attacks. Beginning with 1918, this country has had few symptoms, the last in 1919.

There is no occasion for panic--influenza itself has a very low per cent. of fatalities--not over 10 per cent. of the cases, according to the U.S. Board of Health, which has been the main factor in its transmission, attacking principally persons in a run down condition--those who don't go to bed soon enough, or those who get up too early.

THE SYMPTOMS.

Sudden, if unrelieved, it is on the alert for the disease. It is suggested by weakness and listlessness, and a severe feeling of weakness and depression. The temperature is from 100 to 102, and the fever usually lasts from five to five days. The gums are often sore, the head is also sore, and nasal discharges are frequent, and the throat--those are usually the first symptoms, especially if the eyes are at all times sore or inflamed, and frequently all the symptoms of a severe head cold.

THE TREATMENT.

Go to bed at the first symptom, and stop for your own sake and not to others. Avoid fresh air, smoking, plenty of sleep, and don't worry. Quinine, aspirin or Fever's Powder, etc., must be administered by the physician's discretion. There is no need or specific for influenza. The disease is not a fever. Nothing goes in the wrong track and nothing goes out, except for inflamed tissue. The chief danger lies in the anxiety, which is sometimes worse. Influenza resembles much influenza, but there is a danger of pneumonia and feverish development. Cold, sometimes in the head; colds, and sometimes in the mouth; colds, and sometimes in the stomach. For those reasons, it is very important that the patients remain in bed until the fever is gone. Use enough food, butter, and bread, and keep up the spirits. If the patient's condition is not improved, but instead, gets worse, seek medical advice.

FLU IS ON DECREASE NOW

Trenton, N. J., Oct. 15—The state department of health announced today that reports received from various parts of the state today indicated a decrease in the number of new cases of Spanish influenza. Perth Amboy, however, near the scene of the recent big explosion, reported that deaths were so numerous the bodies may have to be buried in trenches.

SLowing Down at Springfield.

Springfield, Mo., Oct. 15—Reports to the health authorities today indicated that the epidemic of influenza will have run its course here in three weeks and that the ban against public assemblies may be removed next Monday morning. There were four deaths yesterday against seventeen Sunday. Five were reported today. Forty persons are being treated at the Red Cross emergency hospital. Three have died there since the hospital opened last Friday morning. There were 80 new cases reported today.

At St. Louis 13 Deaths.

St. Louis, Mo., Oct. 15—Thirteen more deaths from Spanish influenza were reported and 430 new cases developed here during the last 24 hours. The board of aldermen yesterday passed an ordinance providing a fine of from $5 to $500 for failure of a physician to report cases. The quarantine at Washington university was lifted today as the epidemic there is said to be under control.

YANKS USE TANKS TODAY.
INFLUENZA DEATH NEAR PARDEE

The Globe's correspondent at Pardee, Miss Bertha Moore, died with influenza, last night, at the home of her parents, Mr. and Mrs. S. G. Moore, in Pardee. She had been suffering with Bright's disease since last February, and that made her susceptible to the influenza epidemic. She was only ill with that disease a short time. Miss Moore was 32 years of age, and a bright woman. Her mother died some years ago. Her father married the second time, and he and her own brother, Fred Moore, of Atchison, survive her. Also a half brother, Peter Moore, and two half sisters, Mabel and Tura Moore. The funeral will take place tomorrow afternoon at 2:30 o'clock. The Rev. Ballou will have charge of the services. Interment will be in the Pardee cemetery. Miss Moore was a devout member of the Christian church.

Jacob E. Meeker Is Dead at Home in St. Louis.

St. Louis, Oct. 16—Congressman Jacob E. Meeker died here this morning of Spanish influenza, following his marriage at midnight last night to his private secretary.

BUFFALO BILL'S DAUGHTER DEAD.
THE FLU IS ON THE
DECREASE IN KANSAS.

Dr. Crumbine, However, Says Situation Is Still Serious.

Topeka, Kas., Oct. 16—Responding to the urgent appeal for physicians to help fight the Spanish influenza, three Topeka doctors have been ordered to report for duty at Charleston, W. Va., to the state health officials. They are volunteers in a medical reserve and will be put to work in coal mining towns.

At the same time Dr. S. J. Crumbine of the state board of health is appealing to Washington for physicians to help fight the epidemic in Kansas. Two are urgently needed in Crawford county and one in Thomas county, there being no resident doctor left in the latter place.

Taking the state as a whole, Dr. Crumbine says the epidemic is on the decrease, but in a number of isolation localities, just reporting their first cases, the situation is serious. The total cases in Topeka is 533, with 15 deaths.

MORE DEVILISHNESS
Notice!

Owing to the influenza epidemic, Atchison Lodge No. 4, A. O. U. W. will cancel its meeting Thursday, October 17.

Hugo Bryant, Recorder.
INFLUENZA EPIDEMIC
NOT UNDER CONTROL

That a few persons still are contracting Spanish influenza, probably exposed prior to or early in the quarantine, which was placed in effect last week, is shown by reports from Atchison and county physicians today by telephone to the office of Dr. Charles W. Robinson, county health officer. The epidemic is not yet under control, and Louis Weinman, mayor, said this morning the quarantine would not be lifted before Sunday, and perhaps not then. It would be a grave error, local physicians point out, to raise the quarantine too soon. Seventy new cases were reported to the health office today, covering Sunday, Monday and yesterday, an average of 23 a day. Up to noon today, only five new cases had been reported. The total number of cases to noon today was 271 since the epidemic started.

M'COY FUNERAL
HELD TOMORROW
INFLUENZA DEATH

AT RUSHVILLE

Death called Mrs. Beulah B. Wells, wife of R. B. Wells, of Rushville, this morning at 6 o'clock, caused by pneumonia following Spanish influenza. She had been ill only a few days. Mrs. Wells formerly was Miss Beulah Benton, and was born at Rushville 39 years ago. Funeral services will be held from the house tomorrow afternoon at 3 o'clock and will be brief and private.

Wanted, dining room girl. Home restaurant.
STATE ORDER NOT EXTENDED

But Influenza Ban Will Not Be Lifted in All Localities.

Topeka, Oct. 18.—No action has yet been taken on renewal of the state wide closing order for another week, but state health officials consider it a certainty that the ban will not be lifted in all localities. Dr. S. J. Crumbine, of the health department, says there is no noticeable improvement in the general condition of the epidemic. Increase in the number of victims is particularly large in Topeka and Wichita, 135 new cases being reported here for the last 24 hours. This is the largest day's increase yet recorded here.

Dr. W. R. Mitchell, of the medical training camp at Fort Riley, has been sent to Crawford county to help combat the disease there.

SCHOOL TEACHERS' PAY.
INFLUENZA ON THE DECLINE
---QUARANTINE TO CONTINUE

Only 12 new cases were reported to the office of Dr. Charles W. Robinson, county health officer, today, against 29 yesterday. Six of those reported today are in the city and six in the county. Yesterday 14 were reported in the city and six in the county. Today's rain in Atchison, preceded by rain last night in the southern portion of the county, is expected to help put the epidemic out of business. Dr. Robinson said today the quarantine will not be raised until further notice.

After Bryan Riddle of Baker, Brown county, was arrested this morning for passing a bad check on the Rateman Hardware Company, he admitted to the police he is a deserter from the disciplinary barracks at Fort Leavenworth. Riddle made out a check to John Wells, and endorsed it William Wells, signing the name of John Price. He bought $3.50 worth of merchandise at the Rateman hardware store, and gave Tom Clark the check. Mr. Clark gave it to John Rateman, who called up the First National bank and found it to be worthless. Mr. Clark followed Riddle to Tenth and Main streets, where he found him in a store trying to pass another check. Yesterday Riddle bought a suit of clothes and a pair of shoes from John Leahy, but Mr. Leahy refused to accept a check in payment, and the articles still are wrapped up at the Leahy store. Riddle was serving a term at the disciplinary barracks for deserting from Camp Funston. He was picked up at his home near Baker a few weeks ago by Cal Riddle, sheriff, and was taken to Fort Leavenworth. Ben Pederson, to whom Riddle was turned over by Mr. Clark, will take the man back to Leavenworth this afternoon. The merchants and $3.50 change the man secured from Rateman Brothers was recovered.

FASHION
HOW TO USE VICK'S VAPORUB IN TREATING SPANISH INFLUENZA

The Influenza Germs Attach the Lining of the Air Passages.

When VapoRub is Applied Over Throat and Chest the Medicated Vapors Loosen the Plugging, Open the Air Passages and Stimulate the Mucous Membrane to Throw off the Germs.

In Addition, VapoRub is Absorbed Through and Stumps the Skin, Atracting the Blood to the Surface and Thus Aids in Reducing the Congestion Within.

ALL A PHYSICIAN—DO TO BED-STAY QUIET—DON'T WORRY.

If you have a cold or cough, these tips may help:

1. Avoid exposure to colds—especially those that spread through the air or by contact with others.
2. Wash your hands frequently with soap and water.
3. Cover your mouth and nose with a tissue when you cough or sneeze.
4. Avoid close contact with sick people.
5. Get vaccinated against the flu.

EXTERIOR APPLICATIONS:

In order to stimulate the lining of the passages, you can use VapoRub to help loosen phlegm and relieve the air passages of any mucous or mucus. VapoRub contains camphor, which can help to alleviate congestion.

1. Apply a small amount of VapoRub to your chest and throat.
2. Inhale deeply to help the vapors enter your lungs.
3. Cover your head with a towel to keep the vapors in your nose and throat.

THE SYMPTOMS:

Cold or fever, hoarseness, cough, sore throat, and headache are common symptoms of Spanish influenza. When you are ill, be sure to rest and stay in bed as much as possible.

THE TREATMENT:

Antiviral medications are available for the treatment of Spanish influenza. If you have symptoms, your doctor may prescribe medication to help reduce your fever and relieve symptoms.

NOTE: VICK'S VapoRub in the Discovery of a North Carolina druggist, who learned how to combine essential oils from Nomad and Camel with such essential oils as Camphor, Menthol, and Camphor, which are effective in relieving colds and coughs. These ingredients are blended in the form of vapors.

VapoRub is conveniently now in New York, New England, and a few western states, where you can find it at most drugstores.
BRITISH ATTACHE DIES FROM INFLUENZA.

Second Member of Embassy Victim of Scourge.

Washington, Oct. 18—Major The Honorable Charles Lyell, principal aide to Major General MacLachlan, military attaché of the British embassy, died here today of an embolism following an attack of Spanish influenza. He was the second member of the embassy staff to fall a victim to the scourge. Captain Angus MacIntosh died Sunday.

Major Lyell, though only 45 years of age, was a prominent figure in English public life. He had been a member of parliament and served as parliamentary private secretary to Sir Edward Grey and to Mr. Asquith.

As a soldier, he served in France where he suffered from severe shell shock, which led to his detachment and assignment to Washington. He was the only son of Lord Lyell of Kinnordy and his five year old son now becomes heir to the peerage.
IN KANSAS 2,000
NEW CASES DAILY

Average Maintained During
the Week.

FIGHT IS A DRAW SO FAR

But Dr. S. J. Cumbine Believes
Another Week of Closing Will
Wipe Out Epidemic.

Topaska, Ks., Oct. 19—Reports to
day indicated that the number of new
cases of Spanish influenza in
the state would reach 2,500 today,
this average having been maintained
throughout the week. Up to noon to
day thirty-four counties had reported
1,418 new cases.

Dr. S. J. Cumbine, head of the
state department of health, said the
fight against the epidemic is “a
draw” but that with another week’s
closing order in effect he hopes that
the epidemic will be noticeably sup-
pressed within that period. Danger
was today lower, he said, tends
to aggravate the situation. Toyota
will be another churchless Sun-
day for Kansas. The week’s closing
order also caused abandonment of
effective political campaign plat
ready announced by state committees
of Republican and Democratic parties
here.

Nine persons died today from
the epidemic. This is the largest
day’s toll here yet.

Springfield, Mo., Oct. 19—The In-
fuenza epidemic here has not run its
course. This was indicated today by
reports to the health department
which announced that unless the
situation was much improved Monday
more drastic regulations would be
put into effect immediately. Eight
defeces within 24 hours brought the
total to 144 in three weeks. Only 39
new cases were reported today. A
general closing order which will af-
ect stores and factories is being pre-
pared to go into effect Monday. The
ban against public meetings has not
been lifted.

RAIN INCREASES INFLUENZA

Twenty-three Deaths Reported in Kan-
sas City Today.

Kansas City, Oct. 19—Rain
weather has increased the number of
new cases of Spanish influenza here
and the number of deaths, according
an
the reports to the health
officers, 21 death were
reported, today.

In Kansas City, Ks., eight deaths
and 170 new cases were reported.
The junior high school is being fitted
as an emergency hospital.
QUARANTINE CONTINUES UNTIL NEXT SATURDAY

Following orders issued by the State Board of Health and received by telephone this afternoon by Dr. Charles W. Robinson, county health officer, quarantine regulations to control the epidemic of influenza will continue until next Saturday night. By that time, the state board believes, the danger of a widespread epidemic will be over. In accordance with the order, Louis Weinman, mayor of Atchison, this afternoon extended the Atchison quarantine until that time. There is some doubt whether the order includes next Saturday, but this question will be cleared up later.

Apparently the epidemic is well under control in Atchison, as only six new cases were reported up to noon today, including all new cases since yesterday noon. In Atchison county, exclusive of Atchison, sixteen new cases were reported to the office of Dr. Robinson. This is a decrease over previous days. For the first time since the epidemic started, no new cases were reported from Midland college today.
SALES ARE NOT PROHIBITED

Although permission has been given for the holding of public sales, Doctor Crumbine stated yesterday in Topeka, that crowds must be avoided that no lunches can be served, no public drinking allowed and only persons with business should be allowed to attend.

CHICHESTER'S PILLS
DEATHS FROM INFLUENZA

Ruth Davis and Virginia Nize Succumb.

MISS DAVIS POPULAR Socially

Virginia Miss, 30 Years Old, Was Daughter of Mr. and Mrs. Elmer Jones.

A death which has not a place among deaths of other kinds in Atchison's history is that of Ruth Davis, 29, a daughter of Mr. and Mrs. Elmer Jones.

She died suddenly of influenza, which struck her Monday night. She did not have the sickness before that time. She had never had a very severe case, but this time she did not get over it.

She was born in Atchison, was married shortly after 18 years of age, and two children were born of her marriage.

Died at 4 o'clock Monday morning, after a very short illness, with only her husband at her bedside. Her death was a shock to everyone who knew her.

She was a daughter of Mr. and Mrs. Elmer Jones, who have lived in Atchison for many years.

She leaves a husband and two children.

DEATHS IN ONE FAMILY

Two deaths in one family from pneumonia followed influenza. The death of Mrs. George F. Donnell and the death of her son, George F. Donnell, Jr., at 8 o'clock this morning will be followed by influenza and pneumonia.

Mrs. Donnell died Monday night and the infant, who was born Wednesday night, died this morning.

The infant, who was born Wednesday night, was the last child of Mr. and Mrs. George F. Donnell.

The Donnells have lived in Atchison for many years.

They have been married for many years and have lived in the city all their lives.

The infant was born at 8 o'clock this morning.

The Donnells have living children.

They are leaving the house for the last time.

The funeral service will be held at 1 o'clock this afternoon.
GRADUALLY STAMP OUT FLU

Spanish influenza is gradually being stamped out in Atchison and the county, according to reports today to the office of Dr. Charles W. Robinson, county health officer. Reports including Saturday afternoon, Sunday and up to noon today, a total of 48 hours, totaled only 21 cases, 11 in the city and 10 in the county.

There are no inmates at the emergency hospital, Third and Commercial Streets, and the place has been closed for the present. There were not 11 patients cared for there, and not a death. Mrs. Virginia Kimble, who was in charge of the hospital, is at the home of Dr. Robinson, threatened with influenza, but attending physicians gave her a dose of serum last night and it is believed the flu will be averted. She was quite ill last night from the effect of the serum.

CITY ITEMS.
SPANISH INFLUENZA RAPIDLY SPREADING

Yesterday the Atchison Daily Globe carried a story which will prove
to have been one of the most important of the season. It was
written by a correspondant of the Globe who visited the
Front in France, and is reprinted below.

The epidemic has spread to the extent that the
whole country is now experiencing a severe
health hazard. The number of cases reported
every day is increasing, and it is feared that the
epidemic will continue to spread.

The disease is highly contagious and can be
transmitted through the air. It is important to
practice good hygiene and maintain a clean
environment to help prevent the spread of the
disease.

The symptoms of Spanish influenza include:
fever, cough, headache, muscle aches, and
fatigue. Fortunately, the disease can usually be
controlled with rest and proper hygiene.

The best way to prevent the spread of Spanish
influenza is to take the following precautions:

1. Wash your hands frequently with soap and
water or use hand sanitizer.
2. Cover your mouth and nose with a tissue
when you cough or sneeze.
3. Avoid close contact with sick people.
4. Practice good respiratory hygiene by
coughing or sneezing into your elbow or
a tissue.
5. Stay home if you are sick.
6. Avoid contact sports and crowded
events.
7. Get vaccinated.

In conclusion, preventing the spread of
Spanish influenza is essential to protect the
health of our community. By following these
tips, we can help stop the spread of the
epidemic and protect ourselves and others.
FLU SLOWS IN KANSAS

Decrease of 400 Cases Daily Over Last Week.

Dr. S. J. CRUMBINE REPORTS

Statewide reports indicate favorableness of conditions...
THREE DEATHS IN ONE FAMILY NEAR RUSHVILLE

Three deaths in one family from pneumonia following influenza, have resulted in the home of the late Tom H. Crumpacker, at DeKalb, Mo., in the last week. The latest death was that of Hazel Crumpacker, 19 years old, which occurred last night. Tom H. Crumpacker, her father, died Sunday night, and his son, Ed Crumpacker, who was at Camp Pike, Ark., became ill while home on a furlough and died a week ago Sunday.

Funeral arrangements for the late Tom Crumpacker and his daughter have not yet been made, as word from relatives has not yet been received. Tom Crumpacker was 54 years old, and was a brother of William G. Crumpacker, formerly of Atchison, who now lives at DeKalb.

For many years Mr. Crumpacker clerked in a hardware store at DeKalb and had a wide acquaintance.

The late Mr. Crumpacker's aged mother, Mrs. S. A. Dankston, who made her home with him, suffered an attack of influenza, but escaped pneumonia and recovered. She is more than 80 years old. Two other daughters, Augusta and Thelma Crumpacker, also suffered attacks and both recovered. In addition to the relatives named, the late Mr. Crumpacker is survived by his widow and one son, Fred, who is in France; a brother, Frank, of Denver, Colo., and a sister in Oklahoma. He also is survived by a stepdaughter, Mrs. Kelly Thomas, of DeKalb.

The double funeral will be at 2 o'clock tomorrow afternoon in the park at DeKalb, if the weather is favorable. If not favorable the funeral will be private at the home.
The Flu Epidemic Under Control

Only Five New Cases Reported Today.

In the 123 cases now under observation, only five new ones were reported today in the city of St. C., W. S., compared to the 128 under observation for the last 24 hours. At the same time, there was a slight decrease in the daily number of deaths.

Flu patients are being cared for under strict quarantine in the city of St. C., W. S., which is being observed very rigidly. The city authorities have issued orders to all hospitals to report flu cases immediately, and to hold under quarantine all persons who have had contact with flu patients.

The state health department has also been notified of the situation, and steps are being taken to ensure that all cases are reported promptly.

Moving Pictures Saturday Night

A request has been made to the mayor for permission to hold moving picture shows in the city. The request has been referred to the city council for consideration.

Football Game

A football game is scheduled for Saturday, with the local team taking on a team from a neighboring city. The game will be held at the city stadium, and admission will be charged.

Plea for Greater Vigilance

There is a plea for greater vigilance in the community to prevent the spread of the flu. People are urged to avoid large gatherings and to wash their hands frequently to prevent the spread of the disease.

Today's Deaths

Today, two deaths were reported in the city, bringing the total number of deaths to 123 since the epidemic began. The state health department is working closely with local authorities to ensure that all necessary precautions are taken to prevent a further spread of the flu.

Nurse's Note

A nurse at the city hospital has reported that she has been in contact with several flu patients. She has been placed under quarantine and will not be allowed to return to work until she is cleared by the health department.

End of Report

The flu epidemic continues to be a serious threat to the city of St. C., W. S. The city authorities are taking all necessary steps to control the spread of the disease and to prevent a further increase in the number of cases.

“DON” MULVANE DEAD.

Topeka Millionaire Succumbs to Pneumonia.

Topeka, Oct. 23.—John David Mulvane, 37, who only a few months ago inherited more than a million upon the death of his foster father, John R. Mulvane, died here early today from pneumonia, following an attack of Spanish influenza. Mr. Mulvane was familiarly known as “Don” Mulvane. He is survived by his wife and two children, both girls.
SPANISH INFLUENZA
RAPIDLY SPREADING

Precautions and Remedies Keep
Victims—Protect Yourself Against
It By Taking Tussin.

According to the report issued by
State and Federal health authorities
the Spanish Influenza epidemic is
rapidly spreading to all parts of the
country, and it is now cease that presently
every state in the Union will
be seriously affected before it runs its
terrible course.

It has not only become a great and
mortally menace to the public
health, but unless checked, it is apt to
seriously affect the progress of war
work in all its various departments.
Already the Shipping Board has an-
ounced that ten per cent of its work-
ters had been affected.

The disease has made such great
progress in the last week that it has
spread from the schools to the homes.
Reports from other sections, however,
are equally alarming, and both civil
and military authorities have warned
the public to take every precaution to
prevent its further spread. In every
place schools, churches and theaters
have been closed and public gatherings
of all kinds prohibited.

It is imperative that people
who are weak and rundown are the
earliest victims of the Influenza
epidemic. If you find yourself tired,
weak and losing flesh, or if you are
in a generally run-down condition, or
if you catch cold easily this winter it
should be treated promptly. You are
really in great danger, because the
Spanish Influenza is raging in the
world and you are apt to fall an easy victim
if you come in contact with the
virus. People who are well and
strong are not likely to contract the
disease because they are able to throw
it off. The common-sense way to
keep from taking it is to fortify the
body against attack by building up
its defenses.

In other words to use the old
adage, An ounce of prevention is
two pounds of cure. And if you are
in a sub-normal condition the
proper thing to do is to begin
immediately to build up your power of
resistance. To accomplish this, nothing
on earth will strengthen you and
build up your defenses so much as
Tussin

Our stores are well stocked with
this great expectorant and are
offering it for the ordinary price.

In connection with the Tussin
treatment, it is necessary to keep
the system open by taking Tussin
Chloride Tablets, capsules of which are
included with every bottle of Tussin.
It is also important that the
patient be put to bed and
carefully supervised in the
morning. Be sure to order

FLU CREST HAS BEEN PASSED

Washington, Oct. 24—For the first time since the influenza began spreading through the army camps, the weekly health report of the surgeon-general shows decreases in both hospital admission rates and deaths. The report for the week ending October 18, given out today shows a decrease in the death rate from 206 per thousand to 190 and in the admission rate for disease from 4,780 to 2,914.

The report says the crest of the epidemic has now been definitely passed, the number of influenza cases dropping one half and the number of pneumonia cases decreasing from 17,882 to 11,013.

On Knees to Switzerland.
ANOTHER WEEK OF FLU BAN

NO NEW CASES IN ATCHISON SHOWN

But Officials Hold We Can't Open Before Other Parts of the State

The lid on all public gatherings to continue here.

The ban on public gatherings of all kinds will not be lifted in Kansas or in Atchison county before the end of next week, according to information obtained by Louis Wellman, mayor of Atchison, with Dr. W. J. Crumrine, secretary of the state board of health today.

Dr. Crumrine and the quarantine board have been meeting in Atchison and were in Atchison county before it was in other parts of the state, notwithstanding the fact that it was in effect here several days before it went into state-wide effect.

At noon today no new cases of influenza had been reported to the office of the city health officer, Miss Edna Beld, as a result of the office, and the last one at that time was reported in Atchison county. The new cases in the two homes were reported of yesterday, however, and it is reasonable to believe that will not be any more today.

There will be no church services in Atchison Sunday, and the same rapid regulations will be in effect for all schools and the Atchison & Topeka board will continue effective that was ordered by the state board of health.

Gradual Recurrence in State.

Topeka, Kans., Oct. 14—Necessity for the removal of the state-wide closing order is still expected in the latest report issued by Dr. Wellman. It was issued in the evening yesterday, and closed schools were indicated in the immediate future.

The Kansas state health department has recommended a gradual return to normal conditions, and the same will be permitted in the number of cases as is necessary. Still there are some notable exceptions, however, and it is reported that some persons are still going about the same.

Dr. Crumrine has been notified by the Kansas state health department that the state-wide closing order will be continued until about the middle of November.

Dr. Crumrine said that the state-wide closing order will be continued until about the middle of November.
FLU EPIDEMIC IN KANSAS SUBSIDING FAS

Atchison and Fort Scott Show Greatest Improvement in Past 24 Hours.

Topeka, Oct. 25.—Optimism concerning the conditions of the influenza epidemic in Kansas continued to radiate from the state department of health. Dr. S. J. Crumbine announced that reports show a continued decline of the disease.

In Kansas City, Kas., where conditions have been very bad the last few days, health authorities are improving their organization and reports indicate they are overcoming the crisis. Wichita reports slight improvement.

The last 24 hours have marked the most improvement yet at Fort Scott and Atchison. Manhattan reports great improvement. In Independence and Hutchinson, which have been hard hit, there is little change.

In both deaths and numbers of cases the condition in Topeka is greatly improved.

The appeal for volunteer nurses has met with no response, Dr. Crumbine stated today, and unless the needed are procured today, the appeal will have to be made outside the state.

BEST KANSAS FLU REPORT

Epidemic Now Severe Only in Kansas City, Kas.

Topeka, Oct. 26.—A reduction in the number of new cases of influenza in Kansas from 2,030 last Monday, to 1,071 reported in the last 24 hours, was announced by the state health today. Kansas City, Kas., continues to give the most trouble, 326 new cases being reported today by Wyandotte county.

Dr. S. J. Crumbine, head of the health department, declared that today's report was the most favorable since the epidemic began to sweep the state.

GERMAN REPLY IMPOSSIBLE
NO INFLUENZA AT MIDLAND

Influenza at Midland college is entirely stamped out. Only two patients were left in the building yesterday, and they are able to be out today.

Stopped Her Baby's Cough.
IS INFLUENZA WORSE THAN HUN BULLETS

Claiming More Victims Than Battle Fronts of Europe—Disease Can Be Avoided.

According to carefully compiled statistics it is an indubitable fact that the Spanish Influenza epidemic which is now sweeping all parts of the country is daily claiming far more victims than German bullets on the battle fronts of Europe. Although civil and military authorities have succeeded in checking the disease in some localities, it is growing worse in others and continues to spread at an alarming rate. That the disease can be avoided there is no longer any doubt. According to leading authorities the powers of resistance of the human system can be so perfected that it can throw off almost any infection, not even excepting Spanish Influenza, which is one of the most contagious diseases known.

It is persons who are suffering from lowered vitality, who are weak and rundown and who have not the strength to throw it off who are the earliest victims. Persons who have had colds, who are suffering from catarrhal trouble, or inflammation of the mucous membranes are especially susceptible, as the inflamed mucous membrane linings of the nose and throat are an open door to the germs. This condition is almost always accompanied by a weakened condition of the system.

If you are suffering from any of these symptoms, nothing on earth will build you up and strengthen you like Tanlac, which contains the most powerful tonic properties known to science.

This statement is easily proven by the fact that Tanlac is now having the greatest sale of any system tonic in the history of medicine. In less than four years time over Ten Million Bottles have been sold and the demand is constantly increasing. Thousands are using it daily for the above troubles with the most astonishing and gratifying results.

Tanlac increases your strength and weight and creates a good, healthy appetite for nourishing food. It keeps you physically fit and helps every organ of the body perform its proper function in the natural way.

In connection with the Tanlac treatment be sure and keep the bowels open by taking Tanlac Laxative Dalia, samples of which are included in every bottle.

Tanlac is sold in Atchison by Byrne's Pharmacy, in Effingham by Ebert & Co., and in Mascoutah by Bacon & Son.

(Reprinted from the news of the day.)
Only two new cases of influenza in Atchison were reported to the office of Dr. C. W. Robinson, county health officer today. One death from pneumonia following influenza occurred over Sunday, the 3-year-old daughter of Thomas Ruiz, a Mexican living at 1700 Beach street, dying Saturday night. Today’s flu report was the smallest since the epidemic began, and it is believed the disease has been effectively checked.

When he returns to the Great Lakes
A CURE FOR PNEUMONIA?

If you happen to be on the mailing list of J. R. Johnston, plate glass manufacturer of Pittsburgh, Pa., there is hardly an hour in the day something is not on its way to you from him. His latest is a letter containing a sure cure for pneumonia, which is approved officially by the surgeon general’s department at Washington. Here it is: Roll up a ball of cotton to about the size of a one-inch marble, soak it in alcohol, pour on three drops of chloroform and place between the teeth of the patient. After inhaling the fumes for fifteen minutes allow the patient to rest fifteen minutes, or longer if found necessary, then repeat the operation with another ball of cotton for fifteen minutes and a fifteen-minute rest. If this is done twenty-four times the lungs will be expanded to normal and within twenty-four hours the patient will be out of danger. The cotton balls should be changed twice during each 15-minute inhalation. The letter concludes: "If you have a friend afflicted with pneumonia tell the family or nurse and ask the attending physician to use it."

SCARE AND THE INFLUENZA

If there is an influenza germ it isn't probable that you can annex or acquire it by being afraid, but there is nevertheless, a lot of truth in the position taken by Dr. W. C. White, of Des Moines, Iowa, who urges a course of common sense and the basic ideas of Christian Science directed against fear, in the Spanish influenza epidemic now prevalent there.

"There is no question," said Dr. White, "that by a right attitude of mind people have kept themselves from illness. I have no doubt that many persons have contracted the disease through fear. People can deceive themselves into thinking they have any disease on the calendar, and doubtless many of them have thought themselves into their graves. Fear is the first thing to be overcome, the first step in conquering this epidemic. I am not a Christian Scientist, but I believe an application of their principles will materially aid in preserving the health of this community."

If we can forget the flu, we will soon be rid of it.

Kansas Statewide Order Offically Withdrawn.

BUT NOT MARSHALL COUNTY

In Communities Where Disease Still is Prevalent Quarantine Will Continue.

Topeka, Kas., Oct. 30—The state health department today announced that the state wide closing order against the epidemic of influenza, which has been in operation three weeks will be withdrawn Saturday midnight. Certain communities, however, where the disease still is prevalent, will continue the ban against public gatherings. Dr. J. S. Crumblin, head of the state health department today sent letters of instructions to all local health officers offering instructions on handling community situations.

Marshall county, it was announced, will continue the closing order. Wyandotte county shows only a slow improvement, it was announced. New cases were reported today in some western counties, especially Hodge-

Lifted in Indianapolis.
Indianapolis, Ind., Oct. 30—Indianapolis tomorrow will resume busi-

ness as usual, the ban against public meetings, and orders that business be conducted under certain restrictions because of influenza epidemic having been lifted by the board of health today.

U. S. TANKER WHIPPED U-BOAT.
Only one new family has influenza today, according to reports made since yesterday noon to the office of Charles W. Robinson, county health officer. The new case is Andy Bush, 1209 Julia street. Three new cases were reported at the home of H. B. Mize, Sixth and Parallel streets, and the Mize home is under quarantine again. A total of 10 new cases have been reported since yesterday noon in the city and county, but all live are in homes where the disease has been before during the epidemic.

RETAILERS CAN GET IMMEDIATE SHIPMENTS
BY PARCEL POST.

This advertisement is written on
Monday, Christmas Eve. It is directed
specificantly to all retailers selling Vick’s Vaporub, both wholesale and
retail. We are all aware of the present epidemic—our only—and
our only information is that American Vaporub is
the only drug that will stop this epidemic. We, therefore, call your special
attention to the following:

DANGER OF CONTAMINATION IF RE-
DRYING IS NOT CONSIDERED:
On occasion (as we have done) at
our Kansas City plant, we have
sent for examination to the medical
authorities, not the least of whom
the state medical institution,
whether or not the product is properly
sterilized at the time, it is a normal
and inescapable process.

Then the epidemic of influenza
fears but one such of the last
phlegmophrenic cases in the
United States. The government
thought this epidemic demand
unusual only in a few areas, but
the authorities have not.

We, therefore, call your special
attention to the following:

THE PROBLEM NOW IS TO DIS-
TRACT AND TEMPER SUSPICION.
Most of this tremendous opacity is
still to come to the public, but
honest and exact information will
be necessary, and it may take some
days. The problem, therefore,
will necessarily be to assure our
customers of the absolute
sterility of our product. We
are unable to state the facts
with regard to the
infection.

In this connection, therefore,
we are unable to state the
facts with regard to the
infection.

In our normal efforts to assist
the public, we shall have to
answer the question:

WHAT ARE WE DOING TO
DISMISS THIS EPIDEMIC?

Last week we wrote all of our
dealers, by Special Delivery, of the
honest and exact information on
all sides of this question. Let us
reiterate this order of our duty
whether or not we can assure

HEIR APPARENT AN INFLUENZA VICTIM

King Alphonso of Spain Recovered From Disease.

Barcelona, Oct. 31—Announcement is made here that Ezrabin Abbas, heir apparent of Ahmed Fuad Pasha, Khedive of Egypt, died of influenza on Monday.

Madrid, Oct. 31—It is announced that King Alphonso, who has been suffering from an attack of influenza, has been restored to health.

FLU MASKS WORKED.

Transport With 6,000 American Troops Had Only One Death.

London, Oct. 31—A transport carrying 6,000 American soldiers has arrived at a British port. During the trip there were only fifty cases of influenza recorded. One death was caused by the disease. The success achieved in combating the malady was due, in the opinion of physicians to the fact that every man wore a cloth mask during the voyage.

Oil Price Advanced.
HOW TO FIGHT
Spanish Influenza
By Dr. L. W. Bowers.

Avoid crowds, coughs and cowards, but fear neither germs nor Germans! Keep the system in good order, take plenty of exercise in the fresh air and practice cleanliness. Remember a stiff, clean mouth, a clean skin, and clean bowels are a protecting armour against disease. To keep the liver and bowels regular and to carry away the poisons within, it is best to take a vegetable pill every other day, made up of May-apple, aloes, jalap, and sugar-coated, to be had at most drug stores, known as Dr. Pierce's Pleasant Pellets. If these is a sudden onset of what appears like a hard cold, one should go to bed, wrap warm, take a hot mustard foot-bath and drink copiously of hot lemonade. If pain develops in head or back, ask the druggist for Anuric (anti-uric) tablets. These will flush the bladder and kidneys and carry off poisonous germs. To control the pains and Mar aches take one Anuric tablet every two hours, with frequent drinks of lemonade. The pneumonia appears in a most treacherous way, when the influenza victim is apparently recovering and anxious to leave his bed. To recover from a bad attack of influenza or pneumonia, the system should be built up with a good herbal tonic, such as Dr. Pierce's Golden Tonic Medical Discovery, made without alcohol from the roots and barks of American forest trees, or his Iron tonic tablets, which can be obtained at most drug stores, or sent post free to Dr. Pierce's Invalid's Hotelling Buffalo, N.Y., for trial package.
